Wilfrid Laurier University Public Sector Leadership in Advanced Technology

The Public Sector Leadership Award is presented to a leading individual from the public sector to recognize a significant contribution to the development and application of advanced technology in Canada. The recipient must have demonstrated creativity and leadership in the design and implementation of policies and programs to support the development and application of advanced technology. The recipient will have been consistent in supporting technology and its application. Programs initiated by the recipient must have provided important support to the developers of technology as well as to industries which will benefit from its use.

ICTC Award for IT Strategic HR Management

The ICTC (Information and Communications Technology Council) Award for IT Strategic HR Management is presented to the Information Technology (IT) company or organization that enhanced their performance and reputation by leveraging organization human capital. Their efforts should demonstrate how Human Resources (HR) align with corporate strategic goals and enhances their successes. The winner will have led their organization by effectively providing leadership on HR issues, contributing to business growth and communicating the value of HR. Nominations will be evaluated on an organization's IT HR planning, delivery and execution as well as demonstrated understanding and use of technology, business knowledge and strategic contributions. The organization honoured will also demonstrate their belief and dedication towards understanding the IT sector and its many innovations. Judges will evaluate the extent to which the nominees' HR strategy and actions added value while attracting and developing an engaged, motivated and highly qualified workforce.

TELUS Outstanding Product Achievement Award to Recognize Mobility Health (M-Health) Innovation Excellence in Canada's Health Care Sector

The Award will be presented to a Canadian organization for an outstanding technology engineering development or solution which has resulted in the production of a world-class Digital Health Care product or family of products. The product or solution will have proven itself in operation and its design and market success will have enhanced Canada's international reputation for health care innovation and excellence.

Making the Most of Her MBA Award

The Making the Most of Her MBA Award recognizes Canada's top women MBAs who show, in addition to an outstanding academic record, the skills and motivation for becoming a next generation leader. In judging the nominees for the award, the Selection Committee is looking for women MBAs who have demonstrated consistent innovation and leadership skills. Weighting will be given to academic record, including good overall team play, and Business School initiatives with a demonstrated record of leadership, entrepreneurial spirit, innovative thinking and high potential for career advancement. All candidates should be registered as a full-time or part-time student in a Canadian MBA Program.

Sara Kirke Award for Entrepreneurship and Innovation

The Sara Kirke Award for Entrepreneurship and Innovation is presented to the woman who has shown outstanding entrepreneurship as well as technological innovation or corporate leadership -- leadership that has significantly expanded the frontiers of Canada's advanced technology industry. The purpose of the Award is to celebrate innovation, entrepreneurship and create positive role models for women.
